

Ref: INT02/01/09

Item: Electric Household Type Bread Maker

Description of item:

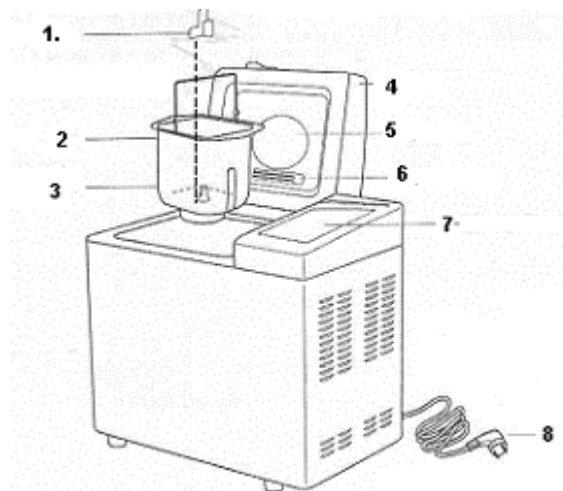

The appliance is an electrically operated household type machine used to make bread.

Specifications:

- **Dimensions** : approximately 28 X 24 X 38 cm;
- **Weight** : approximately 6 kg;
- **Components (refer to diagram below):**
 1. Kneading Blade
 2. Bread Pan
 3. Rotating shaft for Kneading blade
 4. Lid
 5. Window
 6. Steam Vent
 7. Automatic control panel consisting of the following functions / programs:
 - Kneading and baking
 - Kneading only (for baking in another appliance)
 8. Electric cord and plug

The ingredients for bread dough are mixed and baked in a removable container - a bread pan. The bread pan is removable from the housing of the machine and it has a rotating shaft. A removable blade is connected to the electric motor once placed inside the machine. An electric heater heats the ingredients to the proper temperature. The dough is kept at the correct temperature, and the bread is baked.
