

Ref: CG 07/04/09-10

Item : Reinforced Lumbar Belt

Description of goods:

Reinforced lumbar support belt, with posture correction.

Construction/Constituent material:

- Elasticised woven fabric (43 % polyamide, 25 % lapped elastane, 16 % cotton, 16 % polyester)
- A crosswise structure ensuring stability of the belt (preventing it from creasing) and
- A "velcro" fastener.
- The back of the belt is of a width of about 27 cm;
- There are three bands of woven fabric (crossed, by analogy with muscular function) and rigid anatomical boning consisting of four rigid bands perpendicular to the length of the belt (posture correction) at the back of the belt.
- The belt is available in six different sizes, according to the patient's waist measurements.

Use:

Used for prevention and treatment of :-

- acute or chronic lumbago and sciatica- occupational traumatism;
- back pain due to vertebral arthrosis-
- hernias (support of the abdominal wall), or
- as post-operative support.
