Ref: CG 04.10 (April)

Item: "Rollator" – An orthopaedic walking aid.

Description of goods

The rollator is a four wheeled orthopaedic walking aid designed to assist persons having difficulty in walking by providing support for the person pushing it as he/she walks. The height of the rollator is adjustable. The rollator is collapsible and thus allows the equipment to be folded for transport or storage

The rollator consists of :

- a tubular aluminium frame on four wheels (the front two of which swivel)
- handles
- hand-brakes
- a seat between the handles
- a wire basket (for carrying personal items)

The seat allows the user to take short rest breaks when required.
